COMPANY PROFILE

www.indocasafurniture.com

“ Our formula for success lies in translating European techniques and modern design through the outstanding craftsmanship of our local carpenters. ”

Giacomo Bardola
Founder & CEO

“ Finding the right balance between strength design and comfort is our toughest everyday challenge. My team and I constantly strive to develop new creations which outstand the global furniture market. ”

Stephane Colin
Partner & Production Director

WHO
WE ARE

VISION AND MISSION

Indocasa | Company Profile

OUR VISION

Foster ethical practices by providing quality local employment and sourcing exclusively from environmentally sustainable materials.

OUR MISSION

Create exceptionally beautiful, functional and evocative teak furniture that lasts generations and provides incomparable value to our customers.

OUR PURPOSE

Innovate within the teak furniture market by fusing the best in local Jepara, Indonesian craftsmanship with a sleek, modern European design aesthetic.

WE CARE ABOUT THE PLANET

100% Legal Indonesian Teak Wood

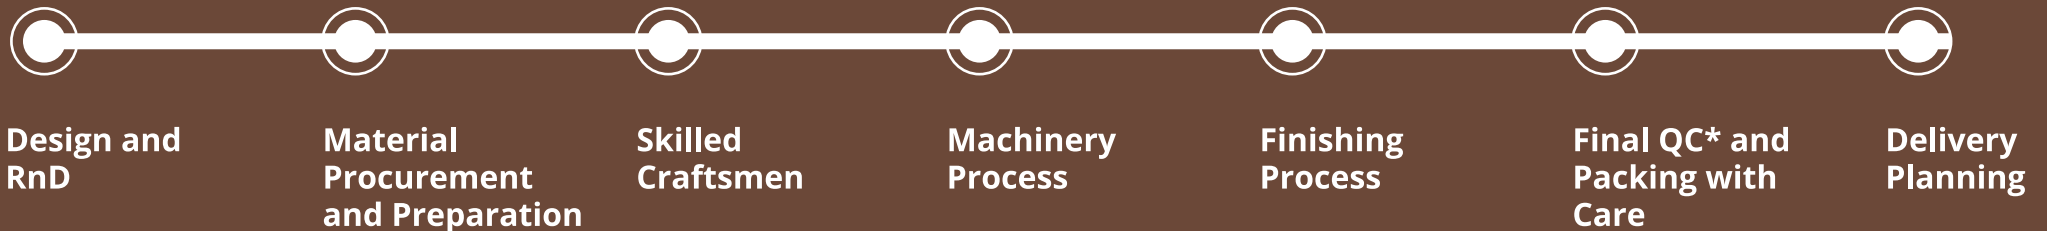

Thanks to the abundant teak wood supply and world class carpenters of the Jepara, Indonesia area, Indocasa Furniture is able to source, design, produce, and ship the highest quality teak furniture at the most affordable prices on the market.

We are committed to creating our teak furniture while maintaining ethical working conditions, using natural finishing products, and sourcing raw materials. We are proud to wear the 100% Indonesian Legal Wood badge which means our teak wood selection has been certified to come from controlled areas which re-plant and re-forest, to remain sensitive to the environmental impacts of deforestation.

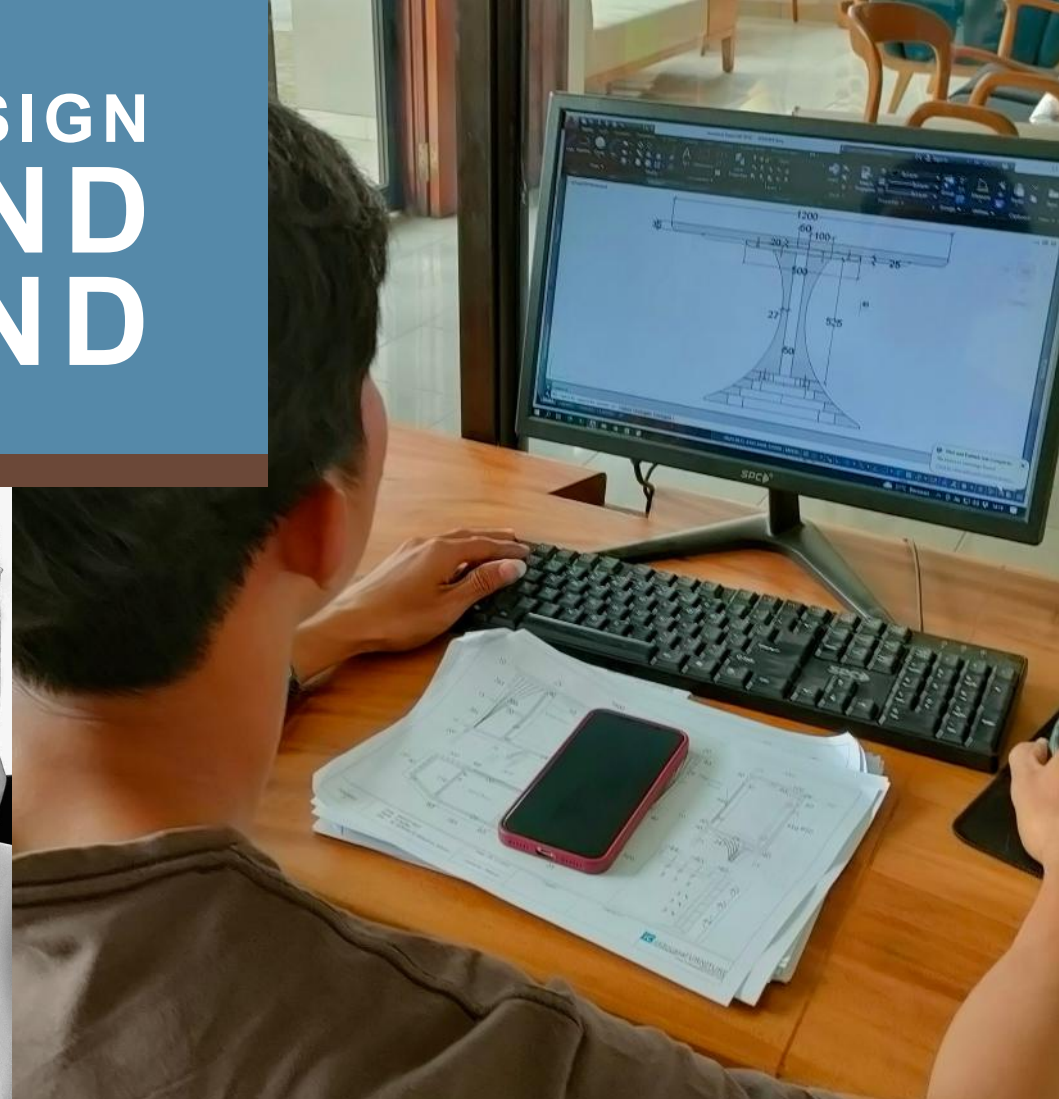

PRODUCTION FLOW

Indonesia's Premiere Teak Furniture Manufacturer

With over 40 years experience in teak wood furniture manufacturing and export, Indocasa Furniture showcases the best in local Jepara Indonesia craftsmanship alongside a history of sleek, modern European design. It's by blending these two qualities together in harmony that we lead the way in furniture trends and innovation, with each Indocasa Furniture piece standing as a work of art that will last for generations.

DESIGN AND RND

Fresh ideas and creations are part of our daily practice at Indocasa, however the earliest stages of new product development are characterized by in-depth studies about material selection and construction techniques.

Our qualified team of in-house drafters with the constant supervision of Indocasa European management continuously develop 3d shop-drawings and prototypes.

Master samples are subsequently fabricated and, if required, submitted for lab-testing prior to proceeding with mass production.

MATERIAL PREPARATION

Meticulous choice of raw materials is key to creation of first-class furniture that lasts in time.

We explore the territory widely to discover the finest sources of teak wood, we establish solid relationships with our suppliers and we work closely with government forestry department to ensure regular trees replantation.

All our wood is then thoroughly kiln dried in house by keeping a stable control of temperature and moisture in the chambers, this process enhances properties and performance of the timber.

Skilled Craftsmanship

Jebara, Central Java, is a worldwide famous hub for carving and woodworking for a very simple reason, here the traditions and skills are passed through generations and mastered in time.

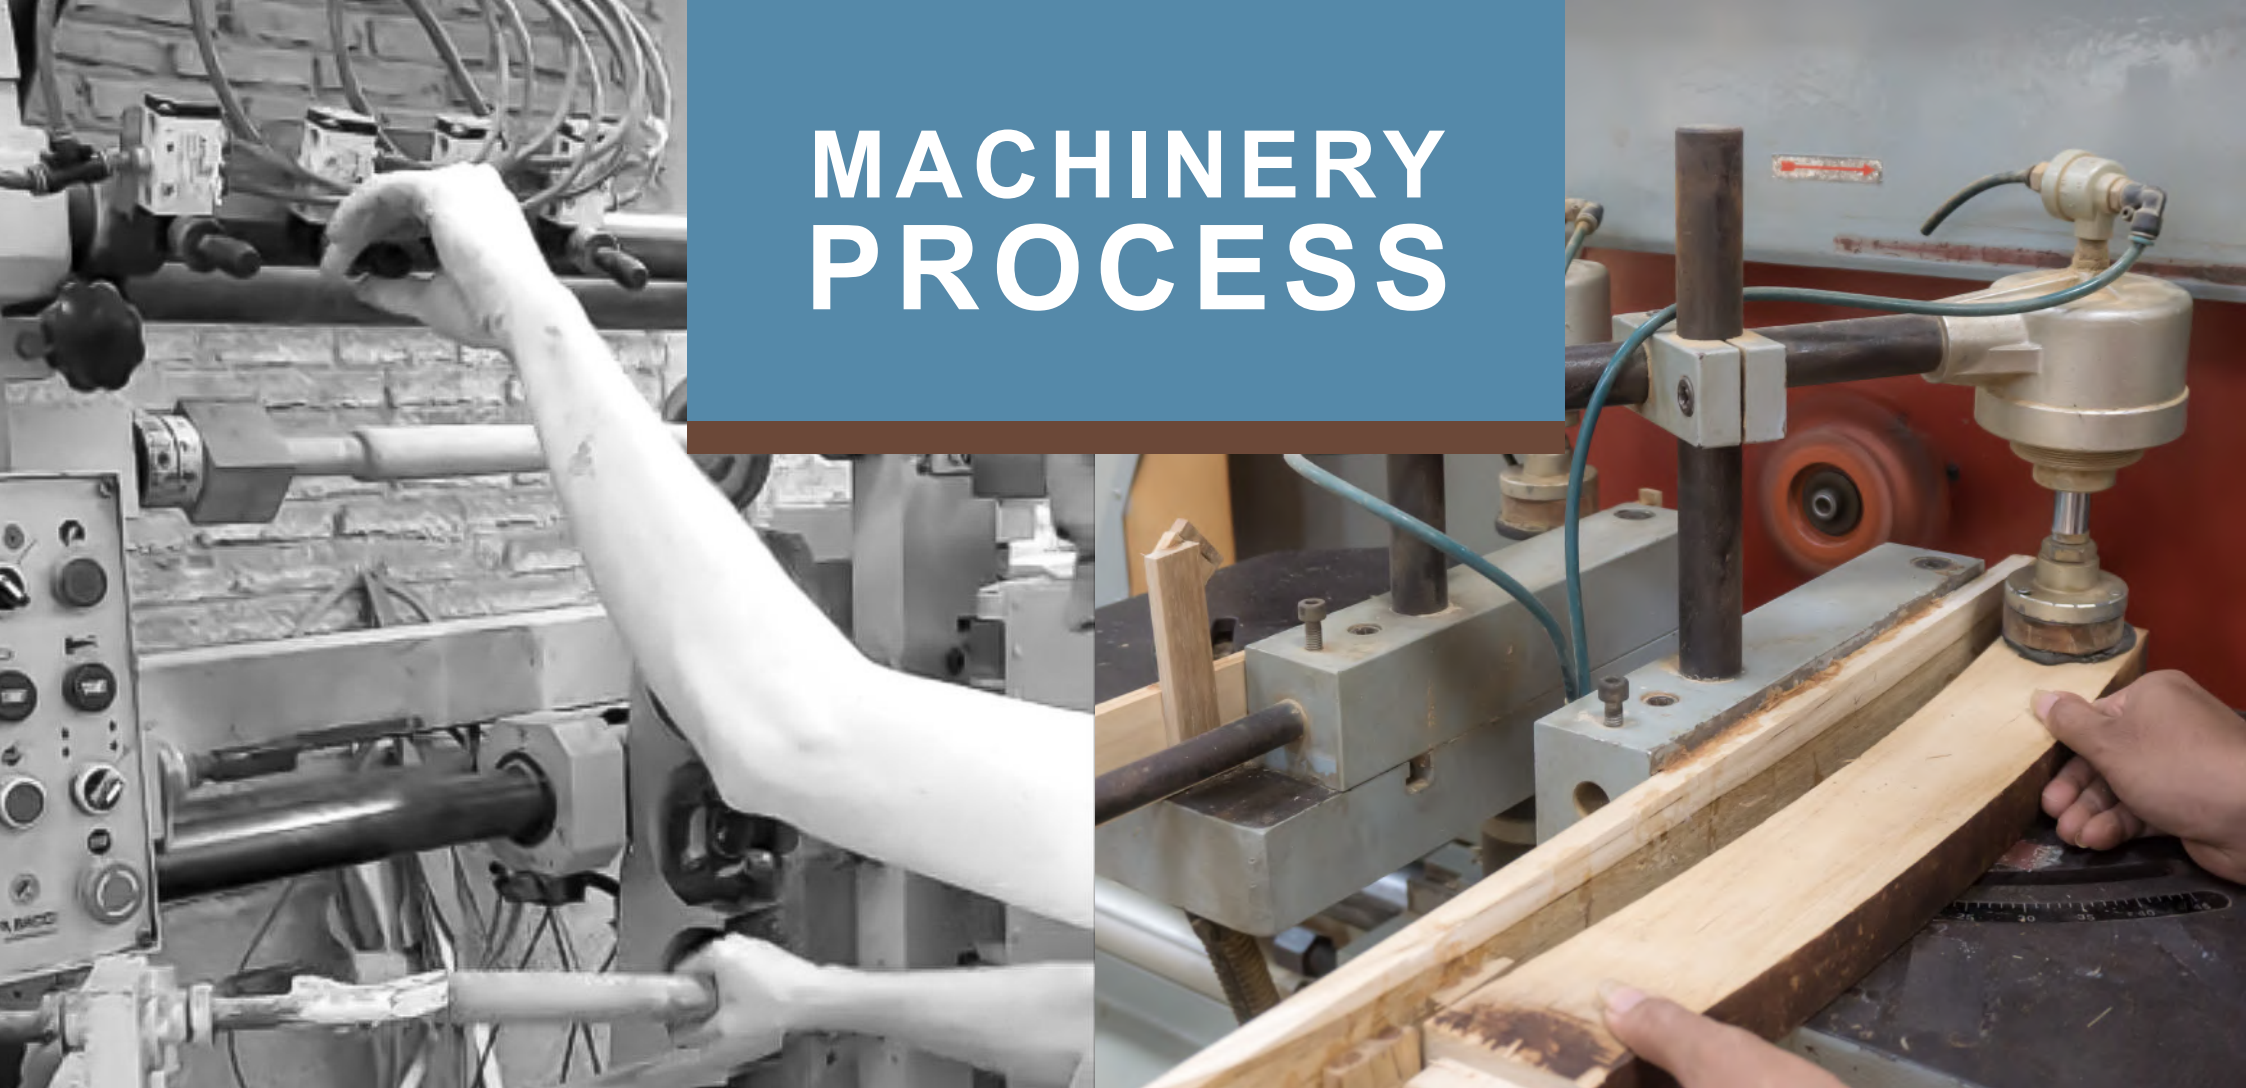

Combining the inborn abilities of our outstanding workers with latest techniques and tools is fundamental to achieve the attention to details which characterizes Indocasa's collections.

In addition, we ensure the best working conditions for our "workers" which guarantee "happy" environment and long term cooperations

SKILLED CRAFTSMEN

MACHINERY PROCESS

At Indocasa we are very attentive at the optimum correlation between usage of wood-working machineries and relying on the prime abilities of our experienced carpenters.

We select some of the most precise tools in the industry to ensure strength in the joineries and lamination and to guarantee up to speed production schedules.

Year after year we re-invest the largest part of our profits to improve the technical side of the business, while increasing capacity and approaching perfection.

FINISHING PROCESS

Since the very beginning of our history, we strongly believed that finishing and the final touch will be vital to outstand in such a competitive market.

Thanks to a fully internalized process we are capable to achieve a variety of tones which ranges from natural look to antique through a diversity of shades from the lightest to the darkest ones. We are also ready to customize finishing following your preferred choices to achieve the ideal mood of your project.

FINAL QC & PACKING WITH CARE

At Indocasa every single piece is thoroughly checked across the whole production process, especially prior to packing operation. We also use a barcode tracking system which allows us to trace the flow of all the items in between the numerous divisions.

We take extra care in choosing the safest packaging methods which vary according to the type of item and customer's requirements, while our team is guaranteeing the needed protection with extra care.

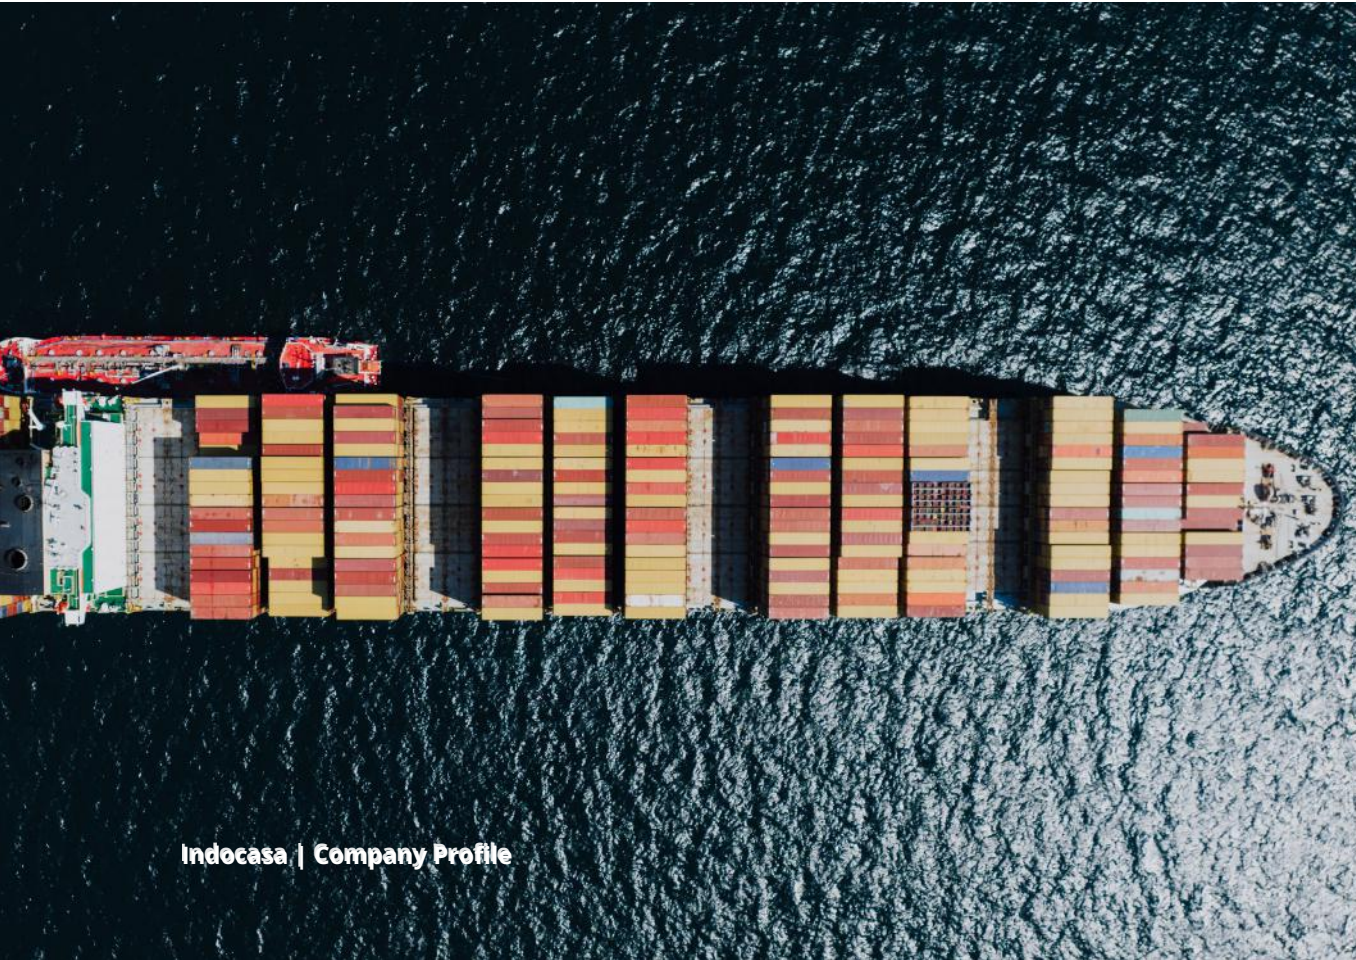

When it comes to logistics and delivery planning, our qualified export department will assist you throughout the whole container booking process. We cooperate with the most reliable forwarding agencies in the globe which will guarantee regular schedules also during the most uncertain times.

We use specialized programs to calculate and maximize the goods load-ability without compromising the safety of the products during stuffing and transportation.

Great attention is also dedicated to the preparation and exchange of the shipping documents avoiding any unforeseen issues during custom clearance.

DELIVERY PLANNING

WHAT WE CAN DO FOR YOU

We work closely with each and every client in order to custom manufacture teak furniture to fit individual needs. Add your home, retail location, wholesale business, hotel, or online shop to our growing list of satisfied customers.
